### Experience

**PlantSense Inc.** June 2008 – Present.

*Web and Graphic Designer*

As the in-house designer for PlantSense, responsibilities include mock-ups for webpage designs, coding in html, css, javascript and php, digital photography, marketing material design, flash designing and a multitude of other projects. Also contributes to the User Interface Design team to create a fluid and easily functions Web 2.0 experience.

**Knack Design + Production.** September 2009 – January 2010.

*Mid-level Web Developer and Designer*

My roll at Knack Design was to be a team player in their San Francisco based graphic design firm. I work with the creative director to develop and maintain sites for a wide range of clients. Responsibilites include having one-on-one relationships with the clients, conceptualizing, developing frontends for websites using html, php and css, and creating and sending e-mail newsletters.

**At&t Mobility.** 2004 – 2008.

*Retail Sales Consultant*

Responsibilities include speaking with customers in a one on one environment. Listening to customer to understand needs and providing solutions to their needs.
